⚡ FiberGuard Outreach — Team Brief

🎯 Goal

Set up short (10 min) conversations with relevant people at Future Leader Summit 2026 to better understand where FiberGuard creates real value.

🧩 How to Reach Out (3 Steps)

1. Choose ONLY ONE question (don't overthink it)

Pick the one that fits best. If unsure, use the first.

Use Case	Default	→ where detecting structural issues earlier could make a meaningful difference in your field or industry
	for investors	→ where detecting structural issues earlier could create meaningful value at scale
Real-World Entry	if they have access to assets / projects	→ where a new way of detecting structural issues could realistically be tested in your environment
Reality	if they are technical / operational	→ how structural issues or damage are currently detected and handled in your context
Action/Implementation	if they are senior / decision-maker	→ what usually leads to structural issues or damage being repaired immediately — versus scheduled for later inspection or monitoring
Blind Spots	if close to failures / operations	→ how is monitoring of critical structures being performed today in your field/industry?
		→ where structural issues or damage are typically discovered late or only after they have worsened

2. Add a short "Background" line

Use one simple phrase that connects to their work. Relate which is the field of interest/action that intersects with FiberGuard

Examples:

- *your work around e-mobility and energy infrastructure*
- *your work in the aviation ecosystem*
- *your perspective on large-scale industrial operations*
- *your work in building innovation ecosystems*

👉 Keep it short. Do your research. Don't copy job titles.

3. Use the Template (copy + fill)

Hi [Name],

saw you'll be at Future Leader Summit 2026 and came across [Background].

We're currently building FiberGuard — a new approach to detecting structural issues in infrastructure in real time. Right now we're deep in the phase of validating where this actually creates value beyond the tech itself.

At the moment, we're trying to understand **[insert ONE question]**.

Would be interesting to hear your perspective if you have 10 minutes during the event.

Best,

[Your Name]

E.g.

Name	Position	Company	Field	Relevance	Background	Angle
Ilse Henne	Exec Board	Thyssenkrupp	Industrial	Strategic industrial view	your perspective on large-scale industrial operations	Use Case

Hi Ilse,

saw you'll be at Future Leader Summit 2026 and came across your perspective on large-scale industrial operations.

We're currently building FiberGuard — a new approach to detecting structural issues in infrastructure in real time. Right now we're deep in the phase of validating where this actually creates value beyond the tech itself.

At the moment, we're trying to understand where detecting structural issues earlier could make a meaningful difference in your field or industry.

Would be interesting to hear your perspective if you have 10 minutes during the event.

Thanks & Best Regards,

Milo

Quick Check (before sending)

- Only **one question** included
- Easy to understand in one read
- No extra explanation added

→ If yes: send

Keep it simple

- Don't over-explain FiberGuard
 - Don't add multiple questions
 - Don't use vague words
 - Don't overthink personalization
-

Reminder

This is not about perfect messages.

It's about **starting relevant conversations quickly**.
